

ZSIVIRA

ZSIVITAN DIZ

Replacement Syntan

Chemical composition	Phenol condensation product
Activity	95 %
Appearance	Light Tan to Off white powder
pH - value 1 : 10	3.0 – 4.5
Charge	Anionic
Shelf life	Upto 10 months from the date of manufacture
Dilution	Added Undiluted

Field of application:

For chrome and semi-chrome leathers and also chrome free leathers.

Properties and Usage:

- » For the retanning of chrome upper leather 2 to 6% of ZSIVITAN DIZ may be used to produce a tight, fine grain with pale coloured leather.
- » ZSIVITAN DIZ provides leather with good fullness and imparts suppleness to the grain and enhances dye leveling with full shade under normally used acid and direct dyes.
- » ZSIVITAN DIZ will provide excellent filling when used in combination with ZSIVITAN ACR – resin and ZSIVITAN VEC or other vegetable extracts.
- » ZSIVITAN DIZ is most particularly suitable for crust leather for both full grain and corrected grain with optimum usage of 2 to 4%.
- » ZSIVITAN DIZ can replace 25% of vegetable tannin which will lead to a better and quicker penetration of the vegetable tannings with improved grain with smoothness and tensile strength.
- » ZSIVITAN DIZ can also be used as a bleaching syntan for vegetable tanned leather upto 3% for obtaining uniform bright colour.

Note: The product being combination of various raw materials, there are chances of variations in colour and viscosity. The property and application of the product will remain same.
Store within 5°C to 35°C in original pack with tightly closed.

The above information on application on leather is given in accordance to the best of our knowledge and our lab applications. As the usage of the product by the consumer is not under our control, we are not liable for any sort of claims or reimbursements. The product is given without any guarantee/warranty in connection to end use.
